Bob

I agree that it would be a good idea to reduce the number of paper copies sent. I will contact the trustee group and propose the following:

1 complete copy of everything (if they want it)
1 copy of the main body of the report with the Appendices on CD
Multiple copies of the report on CDs as requested.

For EPA I would like
1 complete hard copy
and 2 copies of the main body of the report/2 CDs of Appendices
2 CDs of the entire report.

Also for you information, EPA staff is currently being given new computers, the new computers will not have an optical drive. Would be more cost effective to use thumb/flash drives or break reports up so that they can be submitted by email? I do not have this issue and I am not sure if any the EPA staff I am forwarding the report to will have a problem.

Thanks

Subject: Falcon Refinery RI/FS - Data Evaluation Summary Report

Brian:

We have completed the draft Data Evaluation Summary Report (DESR) and are ready to make distribution of this document. According to the Falcon Refinery RI/FS Work Plan, we are to make 13 hard copies and 13 electronic copies of this document for distribution

(EPA - 3 hard copies, 3 electronic copies on compact disc (CD);

9560936

National Oceanic and Atmospheric Administration (NOAA) - 1 hard copy, 1 electronic copy on CD;

Texas Commission on Environmental Quality (TCEQ) - 2 hard copies, 2 electronic copies on CD,;

Texas General Land Office (TGLO) - 2 hard copies, 2 electronic copies on CD;

Texas Parks and Wildlife Department (TPWD) - 2 hard copies, 2 electronic copies on CD; and

U.S. Fish and Wildlife Service (USFWS) - 3 hard copies, 3 electronic copies on CD).

As you know, this document contains the laboratory data that we have generated for the site. With that data, the DESR will be 1000+ pages. In an effort to be more environmentally conscious, we would like to find an alternative distribution approach that will require less hard copy pages.

One option for the hard copies is to make a hard copy of the text, tables and figures and include the remaining portions of the report (APPENDIX B-DATA VALIDATION REPORTS FOR EPA CONTRACT LABORATORIES;

APPENDIX C-EA SUBCONTRACTED LABORATORY ANALYTICAL REPORTS; APPENDIX D-DATA VALIDATION REPORTS FOR EA SUBCONTRACTED LABORATORIES;

APPENDIX E-GEOTECHNICAL LABORATORY REPORT; and APPENDIX F- DUPLICATE DATA/DATA RPDs AND REJECTED DATA) as PDF files on a CD.

Another option is to only provide the PDF version of the document to the various stakeholders.

We are flexible and can produce and distribute the document in any of these approaches or another approach that you may suggest. Please let me know your preference for the distribution of the Falcon DESR.

Thank you,

Bob Owens
